Profile

I am a Web Developer and Tech Enthusiast with ideas to help businesses grow. Born in Ukraine, I have always had great plans and wanted to do as much as possible within the time I am given. I love working with people and brands who want to tell stories and inspire.

Work experience

2016 - 2018

Premmerce

Lviv, UA

Sales Manager

Started as a sales manager in a team of 7 people. Very soon my performance has improved and I started showing great results for the company. I had to leave after some time due to the continuing education program, however, this first work experience has been extremely useful for me.

2018 - 2019

SoftBlues

Lviv, UA

International Customer Relations Specialist

Worked remotely with the company as it switched to new technology and started looking for outsourcing opportunities. Were in charge of communication regarding large scale international projects.

2019

Sylipsis

Athens, GR

Project Manager, Operations / Web Developer

Started as a PM and a junior developer for company projects. After little time proved to bring value to various aspects of work, both internally and with clients. Managed a team of 6 people working on a project.

2020 -

Personal projects

UA/GR

Business Developer & Advisor

Working with businesses to reach their potential through modern kinds of technology, web development, marketing, and internal business optimization. Additionally, creating my products.

Professional education

2013 - 2020

Deree / Greece

Bachelor of Software Development

American College of Greece

BSc (Hons) in Information Technology (Software Development)
Validated by The Open University, UK BSc (Hons)

2018 - 2019

Sylipsis / Greece

Information Technology Internship

Business analytics and web development company

Sylipsis operates the Greek chapter of the MIT Enterprise Forum (MIT EF), which includes running the premier technology competition in Greece, the annual MIT Enterprise Forum (EF) Technology Start-up Competition.

Self-portrait

Soft Skills

I am greatly thankful to the companies, where I worked, for the experiences and the challenges that helped me develop my communication & persuasion as well as the ability to understand. Also, people I work and spend time with consider me rather hardworking, stubborn, and creative in terms of problem-solving. I am comfortable with working with the team as well as leading the development process. In terms of work, I am always open to negotiation, punctual, and never shy to propose solutions.

Hard Skills

In terms of hard skills, my first practical experience happened during my work in Sylipsis and later through my projects. My comfort zone at the moment lies within the web development process. I am comfortable with developing simple websites and basic apps. My brain works in a rather logical way and I enjoy working with numbers, variables, and functions and solving tasks by combining them. However, in this area I always try to get out and try something new, learning new technology, approaches, and solutions.
